Generator Project Progress Update

Pictured above: Removal of the existing generators.

We are excited to have officially started our long-awaited generator installation project. The project started at our Braddock Facility the week of, 4/20/20, and everything is proceeding as planned. As previously mentioned, the new generators can power the entire facility in the event of a power failure. Due to COVID-19, the project start date was delayed. However, after careful consideration and with hurricane season fast approaching the decision was made to proceed with the project. Miami Cerebral Palsy and the installation company, 360 Energy Solutions Corp., are committed to the health and safety of the residents and staff, only moving forward while adhering to social distancing guidelines as well as other necessary mitigation protocols.
